

Member Handbook and Constitution

USS Jaresh Inyo NCC-71859

Written by Commander Larry Clausing and Colonel Shelly Martin

Captain's Welcome

On behalf of the Command Staff of the Jaresh Inyo I would like to welcome you to your tour of duty aboard this vessel.

As the Presidential flagship we have an important role to play both diplomatically and as a peacekeeping vessel. As members of Region 4 we are certain that you will do your best to assist us as we move further along our journey to provide an efficient and professional operation.

We are all proud of where our vessel has come from and look forward to seeing where our members take it.

This handbook is designed, not just to give you an overview of the rules and regulations of our vessel, but to answer those questions that you sometimes hesitate to ask like 'We have a newsletter?!'

It should be read in conjunction with the Starfleet International Handbook to give you a complete knowledge of the requirements of being an SFI member.

Commander Larry Clausing
Commanding Officer
USS Jaresh Inyo

Chapter 1

INTRODUCTION

Welcome aboard the Jaresh Inyo – NCC 71895 – a chapter of Starfleet International.

Due to the fully correspondence nature of this ship we draw our crew from both the Pacific Rim (Australia, New Zealand, and the Chatham Islands), and the United States. We welcome any and all new members.

Our aim is to provide a chapter where those of us who for some reason - be it distance, health, or occupation – are able to join together in a safe, non judgemental environment to indulge our enjoyment of Science Fiction and Star Trek in particular.

Club members meet regularly through yahoo groups, instant messaging, and email.

As a correspondence chapter, all of our communication takes place through electronic means. While we acknowledge that not all people will have access to the internet or a computer, we have chosen this method as it best suits our members' needs.

Please discuss any help you may need computer wise with our Chief Operations Officer.

History

The Jaresh Inyo was born in June 2006 from the dreams of two men, then CO Gary 'Tiny' Holifield and XO Patrick Litton, officially being launched on the 25/06/2006 as a ship in training. Commissioned in Region 12, it drew its crew from Arkansas, Illinois, Kansas, Oklahoma, and Missouri.

Time would pass and see old members leave with first Captain Cory Whorton taking over as XO and then Captain Glenna Julifs taking over as CO short term. The Jaresh Inyo has yet again risen from the ashes with the move to Region 11 with a new CO Shelley Martin and XO Larry Clausung, and Captain Glenna Julifs kindly agreeing to continue as Second Officer. (A new start for some and for others purely a change of view).

In 2014, New CO Commander Larry Clausing and XO Lieutenant Colonel Shelley Martin, the Jaresh Inyo moved to Region 4. Captain Glenna Julifs continues as Second Officer and Chaplin.

With New and old command staff members alike we look to the future and what new challenges it may bring.

Ships Details

The Jaresh Inyo is the first of the Galaxy Class Mk 4's. The external hull of the Galaxy Class Mk 4 is practically identical to most other Galaxy Class vessels currently in service. The one notable difference in appearance is that the hull is the Captain's Yacht and its docking port. The Mk 4 carries a Sovereign Class Captain's Yacht. The hull has a coating of ablative armor.

The differences between the Mk 4 and other Galaxy Class vessels become apparent once one is aboard. The Mk 4 is designated as a diplomatic vessel. As such, 50% of the scientific lab space of the original Galaxy class has been removed to make room for enhanced diplomatic facilities.

There are 4 computer cores aboard the Mk 4's. The primary computer system is a Daystrom Model 17 Bio-Neural Super-series computer. This is a partially cybernetic system which uses "bio-neural gel pack" to augment the standard isolar chips. The primary cores are located in the saucer between Decks 5 and 14. There are two of them, one on each side of the ship thus to balance out the massive weight they entail. The secondary core is in the drive section between Decks 30 & 37. Any single core is capable of operating all computer functions of the vessel.

The fourth core is a secured Daystrom Model 14 Bio-Neural Super-series computer core. The Model 14 was originally designed as a replacement for the Defiant Class computer core. The twin processing cores are located in the center of the saucer section between decks 5 and 7. This core is used to secure sensitive diplomatic data.

The Mk 4 drive section are equipped with a Class 8 Standard Matter/Anti-Matter Reaction Drive, developed by General Electric Propulsion Laboratories. Advances in pressure vessel construction and compact reactor injector nozzles made the Class 8 reactor a reality, with a six-lobed design that allowed for a total of seven reactant streams of both matter and antimatter to collide in the dilithium articulation chamber, resulting in the most powerful starship-grade reactor output to date. Another large advancement utilized in the development of the warp propulsion system was the utilization of a rotatable dilithium articulation chamber within the warp core, where the matter and antimatter reactants are combined to create the high-energy warp plasma needed to power the engine nacelles, as well as shipboard systems through the use of

EPS power taps. Computer-controlled rotation of the frame allows for manipulation of the manner in which the reactants meet, allowing for further control of the warp plasma into a "cleaner" power source.

Leeding Engineering Ltd. redesigned the verterium cortenide components within each pair of nacelles. The warp field coils is able to use the warp plasma to generate a more energy-efficient subspace field with less particle waste products and stresses that were found in older propulsion systems to damage subspace. The Jaresh Inyo has achieved a Fleet speed record of 9.991 during trails.

The most notable difference between the Mk 4 and other Galaxy classes is that the saucer section is now capable of warp speed. The saucer section warp core is a modified Class 7 warp core. The warp core is located on decks 10, 11, 12 of the aft saucer section engineering section and spans the top three decks vertically.

The nacelles incorporate an in-line impulse system, which accepts matter intake and heating within the nacelles and exhausts the heated gases through a space-time driver assembly in the nacelle aft cap. Antideuterium is stored in a series of standard Starfleet antimatter pods forward of the warp core.

The warp field coils, unlike most Federation ships, are located within the hull as opposed to outboard nacelles. The basic structure of the nacelles is similar to that of the remainder of the saucer section, however, the entire length of the nacelle housing is augmented with longitudinal stiffeners composed of cobalt cortenide to protect against high levels of warp-induced stress. Throughout the nacelle housing are triply redundant conduits for Structural Integrity Field (SIF) . The Class-7 warp reactor for its size. Advances in variable warp field geometry ensures that the saucer section will not cause harmful subspace damage. The standard maximum warp speed of the saucer section is Warp 7 for 12 hours.

Upgrades to the Mk 4 tactical systems includes upgrades for it's 13 type XII phaser arrays; new torpedo launchers capable of firing the mk XXVI photon torpedo, mk III quantum torpedo, tri-cobalt devices and probes; new tactical sensors and software, and regenerative deflector shield. An additional torpedo launcher was added to the bow of the saucer section above the captain's yacht. It is hidden under a retractable hull plate.

Chapter 2

CHAPTER CONSTITUTION

The structure of the constitution of the USS Jaresh Inyo is based upon the principals of compliance and active participation by the members. While the rules and regulations of the Starfleet Members Handbook will apply as the controlling influence on administrative and functional activities of the chapter, USS Jaresh Inyo members may find other unique regulations, guides, or rules that form part of the regional requirements.

Applications of the rules and regulations as stipulated by Starfleet International will always provide the basis for chapter management.

General Administration

General administration is managed by the command staff, which consists of the Commanding Officer, Executive Officer and Second Officer.

The command staff is responsible for keeping the chapter up and running and seeing to the needs of all members. They are also responsible for ensuring the chapter is in compliance with both Region 11 and Starfleet International rules and regulations.

The Command Staff are responsible for appointing all Department Heads after considering all applications from ship members.

If any of the Command Officers on the Command Staff becomes unable to carry out their duties the most senior remaining Command Officer is responsible for either appointing another member in their place, or opening the position up for applications from the crew.

Membership

1. Other than the annual fees to SFI for membership no membership fee applies to the USS Jaresh Inyo.
2. Membership in SFI is mandatory for all members bar the cadets (5-18 year olds). Cadets have the option of joining as members of SFI or just enjoying the cadet activities. Ranks will still be given they will just not be official with SFI.
3. Crewmembers are required to join a department in order to be considered an active member and are encouraged to do so. Members who are undecided as to which department to join will be automatically joined with the department with the least members by the Executive Officer. Members may apply for a departmental transfer at any time.
4. Once a member, all crew must respond to the membership audit every 6 months in order to remain active. Audit forms will be sent to you via your department head and the Chief Operations Officer and a prompt response is expected.
5. Interaction is via the internet which means that access to internet and email is crucial.
6. Crew members may hold one of the following membership types:
 - a. **Active:** A member of the Jaresh Inyo is a paid up member of the SFI, has joined a department, and is signed up to all applicable JI yahoo groups (this includes those who have chosen reserve membership). These members hold voting privileges.
 - b. **Unassigned Crew:** A crew member that does not belong to a department of the chapter. Unassigned crew are ***NOT*** eligible for promotion. Unassigned crew ***DO NOT*** have voting privileges.
 - c. **Cadets:** Younger members of JI, may or may not be a paid up member of SFI, and again is signed up to all applicable JI yahoo groups. These members only hold voting privileges in situations that directly affect them.
 - d. **Friends of the JI:** These are people who are recognised by the members of the JI as upholding the tenets of Star Trek, or working in the community to better situations. These members do not have voting privileges.

- e. **Ambassadors:** Ambassadors are crew members of a different chapter, who does not hold an active membership on the Jaresh Inyo. Ambassadors do not have voting privileges.

Membership and Membership Renewals

Membership is defined as being a member of good standing in SFI (that is membership dues paid up to date) who has designated the USS Jaresh Inyo as his or her chapter.

Renewal dates are clearly labelled on the SFI membership cards and can also be found on your database record.

You may also request information on your membership directly from the office of the Director of Computer Operations, SFI or information on your USS Jaresh Inyo records directly from the chapter's Chief Operations Officer.

Penalties may affect both your USS Jaresh Inyo and SFI memberships should you not renew within guidelines as set out in the SFI Handbook

Membership Responsibility

The Command Staff of the USS Jaresh Inyo have no intention of creating an exhaustive list of how members are expected to behave. We will instead state that members need to remember that you are at all times acting as ambassadors for both SFI and the Jaresh Inyo and should behave accordingly.

If any member of the Jaresh Inyo has concerns over the behaviour of another member they may email the Commanding Officer and the Executive Officer with their concerns. Each instance will be reviewed on a case by case basis.

Important Guidelines

1. The USS Jaresh Inyo is a family orientated chapter/sim linked to SFI. This means that all materials posted to the main emails and yahoo groups must be appropriate for viewing by children. A dim view will be taken of any deliberate

sending of pornographic or objectionable material (including use of vulgar language). However understanding will be given in cases where emails have been hacked with the expectation that the member will fix the issue within 7 days of being notified. In the case of deliberate posting of objectionable material ONE WARNING will be given. If this is ignored the member will be expelled from the Jaresh Inyo and an email will be sent to the SFI.

2. The Jaresh Inyo sim is 18+ rated; there will be no JI cadets allowed on this sim. This rating is for the protection of all as subjects that are inappropriate for minors may be discussed and relationships between characters may be explored but again this is not to be at the level of pornographic.
3. Any Starfleet member joining the USS Jaresh Inyo will be expected to meet 'time in grade' requirements and any points as applied by the Chapter's points system.
4. The USS Jaresh Inyo will recognise the ranks of any transferring members of SFI with notification from either the CO or Personnel Officer of the other ship. To maintain this rank upon transfer the member must ensure they join a department and within 6 months have made an attempt to meet the requirements for their grade.

Chapter 3

RANKS AND PROMOTIONS

The USS Jaresh Inyo uses the enlisted and officer ranks of both Starfleet and the Starfleet Marine Corp.

All new members are assigned the grade E-1 which is the rank of crewman apprentice or private first class or in the case of cadets the grade of M-4 which is the rank of midshipman 4th class or more colloquially known as plebs.

Information on how Starfleet International is run is seen as important on the Jaresh Inyo, we pride ourselves on being the Presidents ship and as such any person wishing to hold the rank of an officer must complete Officer Training School (OTS) and preferably Officer Command College (OCC).

Once OTS is completed the person will be granted the rank of O-1 or Ensign. It should be noted however that it is not necessary for someone to take officer rank just because they have completed OTS.

Promotions from this point on are entirely controlled by how much or how little you wish to be involved in the chapter.

Senior appoints as Department Head or Assistant Head do not necessarily come with a promotion but consideration of this increased responsibility will play a part in the promotions committee's decision.

In general the grade of O-5 Commander or Lieutenant Colonel is the highest rank one can achieve without taking command of the ship or being involved at the Regional/International level. Officers at this grade will have taken an active part in the ship and its day to day running, have held a Department Head or similar senior role for several years and will have taken and passed the OCC.

Flag Ranks

The rank of O-6 Captain or Colonel can only be given in 3 ways:

- a) By assuming command of the Jaresh Inyo or another Starfleet Chapter.
- b) At the discretion of the Regional Commander, usually at the recommendation of the persons commanding officer.
- c) By order of the SFI Executive Committee

The Executive Committee, sitting as the promotions board for Starfleet awards all flag ranks of O-7 grade or higher.

Any member of the chapter may recommend an officer of O-6 or higher for a flag rank. Flag rank nomination forms are available from Starfleet Headquarters.

Promotion Requirements

What follows is the promotions policy that has been created for the Jaresh Inyo. This “policy” is to be considered a “guideline” and ranks may be given or taken away at the discretion of the command staff and promotions committee.

Time requirements are the minimum time in grade before you are eligible for a promotion but this will also be assessed on academy requirements and additional points.

Additional points come from being active with the ship, due to the online nature of the ship these have had to be creative.

100 points – these can be gained by completing the officer training course (OTS), or by gaining a Doctorate in either the Starfleet or Marine Academies.

50 points - can be gained by passing the officer candidate course (OCC), or by gaining a Masters in either the Starfleet or Marine academy.

30 points - gaining an associate degree from the Starfleet or Marine academy

25 points – joining Starfleet or renewing your membership

20 points - Passing a Starfleet or Starfleet Marine course, or publication of an article in the Jaresh Inyo newsletter

10 points - Participating in a chapter’s charity function or submitting a half page article to the Jaresh Inyo newsletter

Enlisted Marines

| Grade | Time Requirements | Academy Requirements | Additional Points |
|--------------------------|----------------------------|--|--------------------------|
| Private (E1) | | PD-10 | |
| Private First Class (E2) | 1 month as Private | PD-11 | 20 |
| Lance Corporal (E3) | 1 Month as PFC | PD-12 and PD-13 | 40 |
| Corporal (E4) | 2 Months as LC | PD-10, IN-10, NCO-10 and -10 from chosen branch of service | 60 |
| Sergeant (E5) | 3 Months as Corporal | PD-10, IN-10, NCO-10 and -10 and -20 from chosen branch of service Must also have one MOS | 80 |
| Staff Sergeant (E6) | 4 Months as Sergeant | PD-10, IN-10, NCO-10, NCO-20, LD-10, -10 and -20 from chosen branch of service Be working towards a second MOS | 100 |
| Gunnery Sergeant (E7) | 5 Months as Staff Sergeant | PD-10, IN-10, IN-15, LD-10, LD-20, NCO-10, NCO-20, -10, -20 and -30 from chosen branch of service Completed 2 nd MOS | 120 |
| | | PD-10, PD-20, IN-10 | |

| | | | |
|----------------------|-------------------|---|-----|
| Master Sergeant (E8) | 6 months as Gunny | and -15, all courses for their chosen Branch of Service, LD-10, LD-20, NCO-10, -20 and -30 3 rd MOS | 140 |
|----------------------|-------------------|---|-----|

Officer Marines

| Grade | Time Requirements | Academy Requirements | Additional Points |
|---------------------------------|--------------------------------|---|-------------------|
| 2 nd Lieutenant (O1) | | PD-10, OTS, -10 in chosen branch of service | 200 |
| 1 st Lieutenant (O2) | 2 Months as 2 nd Lt | PD-10, OTS, PD-14, PD-15, IN-10, IN-20 an one MOS | 300 |
| Marine Captain (O3) | 4 Months as 1 st Lt | OCC, PD-20, -20 in chosen branch of service, -10 in a branch related to the duties they carry out Must have command staff position | 600 |
| Major (O4) | 6 Months as Captain | PD-30, -30 in chosen branch of service, LD-20, and -20 in a branch related to the duties they carry out | 1200 |
| Lt Colonel (O5) | 6 Months as Major | -30 in a branch related to the duties they carry out | 2500 |

| | | | |
|--------------|------------|---------------------|------|
| | | CA-40, ST-40 | |
| Colonel (O6) | CO of Ship | CA-50, ST-50, MH-40 | 5000 |

Enlisted Fleet

| Grade | Time Requirements | Academy Requirements | Additional Points |
|---------------------------------|-------------------------------|----------------------|-------------------|
| Crewman Recruit (E1) | | | |
| Crewman Apprentice (E2) | 1 month as Crewman Recruit | | 20 |
| Crewman (E3) | 1 month as Crewman Apprentice | | 40 |
| Petty Officer 3rd Class (E4) | 2 months as Crewman | | 60 |
| Petty Officer 2nd Class (E5) | 3 months as PO3 | | 80 |
| Petty Officer 1st Class (E6) | 4 months as PO2 | | 100 |
| Chief Petty Officer (E7) | 5 months as PO1 | | 120 |
| Senior Chief Petty Officer (E8) | 6 months as CPO | | 140 |
| Master Chief Petty Officer (E9) | 1 year as SCPO | | 160 |

Officer Fleet

| Grade | Time Requirements | Academy Requirements | Additional Points |
|---------------------------|--------------------------------|----------------------|-------------------|
| Ensign (O1) | | OCC | 200 |
| Lieutenant JG (O2) | 2 months as ensign | | 300 |
| Lieutenant (O3) | 4 months as Ltjg | | 600 |
| Lieutenant Commander (O4) | 6 months as LT | | 1200 |
| Commander (O5) | 1 year as lieutenant commander | OTS | 2500 |

| | | | |
|--------------|------------|----------------------------|------|
| Captain (O6) | CO of Ship | OTS, COCD-101, COCD-102 | 5000 |
|--------------|------------|----------------------------|------|

Chapter 4

Departmental Responsibilities

To create a semblance of order and responsibility the USS Jaresh Inyo is divided into differing areas (Departments) which mirror those on board a Starfleet vessel.

Management of these departments is considered a senior role and the responsibility and appointment to the position of HOD (Head of Department) is to be taken seriously.

These senior officers are expected to provide and maintain the necessary functions and activities that help the ship run smoothly, and subordinate staff are deployed in each department based on skills, interests, or experience.

Departments have been structured in a manner that best serves the department heads and the command staff. These positions can be altered, adjusted, added to, or changed according to the needs of both the vessel and the department.

Department Heads Positions

Just like the senior staff positions, these positions are appointed and/or removed by the CO in conjunction with the command staff. The Commanding Officer has the right to remove any officer that he/she feels is not performing in the best interests of the department or ship and replace them with another officer. Command Department personnel have specific assigned duties that support the Command Staff (CO, XO, SO). Command Division positions often require several hours of work a week, and should only be accepted if adequate time can be given to the position. Please be assured that any Command Staff must follow the Starfleet Code of Conduct.

Department heads (Med, Sci, Comms, Tac/Sec, Eng, Flight, Diplo, Morale/Religious) should appoint an Assistant DH to help in the running of the department with the ability to run the department in an emergency (Family issues, sickness etc).

1. MSR's are drafted by all department heads by the end of the third week of the month and sent to the XO for compiling no later than 7 days before the CO's MSR

is due to be sent to Starfleet. Failure to produce this report could lead to disciplinary action.

2. The Commanding Officer will publish an MSR to the crew.
3. Each department is encouraged to publish a column in the quarterly newsletter.
4. Each department is encouraged to support their staff's on-going education through the academies, and furthering of their careers in Starfleet.

Command Department

The command department is charged with the everyday running of the starship. The commanding officer, as head of the department, is also the senior officer on board.

The command department sets and chairs meetings, files reports regionally and internationally, and oversees the ships finances.

Specific responsibilities of Command Officers are as follows:

Commanding officer

The Commanding Officer is responsible for regional and international reports, inter-chapter relations, advertising, finances, overseeing the cadets, helping run the JI simm, creation of JI specific handbooks and forms, weekly yahoo group updates, and a weekly activity for the starship crew to enjoy.

Executive Officer

The Executive Officer is responsible for compiling department head reports, discipline, chapter events, awards and promotion record keeping, backing up the CO.

Second Officer

The second officer is responsible for the running of the quarterly newsletter, meeting agenda's (or email agenda's), overseeing the finances in conjunction with the Chief of Operations, and the role of morale/religious officer on board.

Communications Department

This department is responsible for making the ship's presence known to other ships via online groups, newsletters, chat groups and any other methods available.

Communications is also responsible for the designing of ship certificates, maintaining handbooks, and ensuring the smooth running of the yahoo groups that the ship members belong to.

Chief Communications Officer

- Responsible for the monthly division report to the XO and CO
- **Maintains the ship's log (history of the vessel)**
- **Keeps the crew apprised of the latest Scifi movies, books, and TV series.**

Assistant Chief Communications Officer

- Helps the chief in their duties and takes over when the chief is unable to carry out their duties due to real life issues.
- Maintains and updates all forms used by the ship for internal communication.

Operations Department

Operations are responsible for the personnel records section. This department maintains secure information on all crew and ensures that the correct information is available on a need to know basis.

Ops maintain a register of academy courses taken by members so that the information is available to the promotions committee. It is also the point of contact for all members and is used as a conduit to all other departments.

The chief operations officer is a member of the promotions committee.

Chief Operations Officer

Responsible for accurate member records, provides up-to-date roster information, reminds members of renewal dates, keeps track of member's progress towards promotions, and is responsible for the overall running of the department.

Assistant Chief Operation Officer

Responsible for helping the Chief Operations Officer as needed.

Computer Operations Department

The Chief of Computer Operations is the primary person responsible for the design and maintenance of our website, including posting announcements, birthdays, and of course the newsletter. Additionally, COMPOPS maintains all command networks and computer systems and assists crew members with any issues pertaining to computer technology.

Security Department

The main goal of the Security Department is to maintain the ship's security systems, tactical systems, and offensive/defensive measures. The Chief of Security and Tactics are responsible for keeping the Command Department up to date on all foreign weaponry, including new technology of enemy species, weapon overhauls, and maintenance. During away missions, regulations state there will be one security officer for every Command Line Officer sent into a dangerous mission. Security officers are also

called upon during delegations to act as body guards for visiting dignitaries, including other races. Security and Tactics are also assisted by these positions listed below.

Chief of Security

Provides information on uniforms and dress code. Issues dress code instructions to the crew as recieved from Command. Assists the crew with advice on procurement of uniform items.

Assistant Chief of Security

Assists the Security Chief as needed.

Master at Arms

The Master at arms is responsible for seeing to the Command officers needs during meetings, conventions, and conferences. This crewmember will also be responsible for welcoming members (especially new members) when face-to-face meetings are held. This includes issuing name tags to visitors and dignitaries if necessary.

Science Department

The Science Department operates to increase the interest and knowledge of science for the crew in the fields of real science and astronomy. The Science Department is charged with researching all things Scientific, from spatial anomalies to space-time vortices, from planetary to physical, anatomical to zoological, this is the department that has all of the answers. The department is assisted with the offices listed below

The Science Department is also responsible for researching and recommending charities within the Chapter's operational area.

The real world aspect of the Chief of Sciences is to keep the crew updated on specific charities within their areas, and if any one participates in a charity, that person sends their information into the Chief of Science who then includes it in his/her reports. .

Engineering Department

Engineering keeps the ship flying. They are responsible for the engines (warp and impulse), life support, systems relays, power grids, shields, and everything else which keeps this vessel operative.

The following list of duties are assigned to to the Engineering Deparment:

- Fabrication of props when we visit a Regional or Fleet Event.
- Report on real life technological advances.
- Report on real life computer, telecommunication, and gaming (computer/board/card) information.
- Report on any Trek related information.

Chief Engineer

The Chief Engineer is responsible for the monthly reporting of his/hers department. Overseeing the fabrication of props.

Assistant Chief Engineer

Assists the Chief Engineer as needed.

Medical Department

The Medical Departments duty is to provide the crew with real life health and safety data that can effect their daily lives. The department also reports sports, health fads, nutrition, and healthy living.

Chief Medical Officer (CMO)

The Chief Medical Officer is responsible for updating the crew on advances in medical sciences,. The CMO is also responsible for helping maintaining the health and safety of the crew. Part of this role will be establishing procedures for how to create suitable first aid and emergency disaster kits. Encourage the crew to take a CPR, First Aid classes.

Assistant Chief Medical Officer

Assists the CMO as needed.

Ship's Counselor

The Ship's Counselor is responsible for assisting the crew with personal issues that may rise involving their membership and with their relationship with other members of the crew.

Ship's Services

Ship's Services provides the crew with a variety of recreational activities and official chapter activities.

Chaplain

The Chaplain provide spiritual and emotional support for the crew.

Cadet Corps

The mission of the Cadet Corps is to mentor, support and educate our junior members. The Cadet Corps is directly supervised by the Commanding Officer of the Jaresh Inyo. The CO ensures that there is a safe environment which the Cadets are able to participate in activities.

Cadet Commanding Officer

The Cadet Commanding Officer is the senior cadet in the Cadet Corp. S/He is responsible to reporting to the CO of the Jaresh Inyo. S/He is also responsible for planning Cadet activities.

Cadet Executive Officer

The Cadet Executive Officer assists the Cadet Commanding officer as needed.

Marine Strike Group (MSG)

The Marine Strike Group is a separate entity from the standard departmental organization. When a MSG is part of the Jaresh Inyo, the MSG reports to the Commanding office and Executive Officer. The Marine Officer In Charge (OIC) reports directly to the Executive officer.

Officer In Charge (OIC)

The OIC is the ranking officer of the MSG. The OIC organizes activities for the MSG. The OIC is responsible for reporting the status of the MSG to the Jaresh Inyo Executive Officer.

Deputy Officer In Charge (DOIC)

The Deputy Officer In Charge (DOIC) is the MSG Executive Officer. S/He assists the OIC as needed.

Chapter 5

Uniform and Dress Codes

For fictional purposes, the USS Jaresh Inyo was commissioned in 2395 and as such the USS Jaresh Inyo uniform reflects the standards of the period. While other era uniforms are permitted, the uniform code described in this chapter is the uniform to be used for official chapter functions.

Starfleet Uniform Duty Uniform

Admiral's Uniform

Command/Flight Operations Uniform

Engineering/Security Uniform Medical/Science

Cadet Uniform

Starfleet Duty Uniform

The duty uniform consist of a jacket, slacks, boots, under shirt, combadge and rank pips. The jacket matches a crewmember's departmental color. The combadge is placed on the left breast below the jacket's piping. The rank pips are placed on the right breast above the piping. The slacks are black and wrinkle free. The boots are black EMS boots. They are lightly polished.

Cadet Duty Uniform

The Cadet duty consist of a gray jacket, grey slacks, undershirt, combadge and rank pips. The combadge is placed on the left breast below the jacket's piping. The rank pips are placed on the right breast above the piping. The slacks are wrinkle free. The boots are black EMS boots. They are lightly polished.

Marine Duty Uniform

Members of the Marine Corps are required to adhere to the strict dress code of the Corps. The duty uniform for Marines aboard the Jaresh Inyo are the Class B and C uniforms.

Chapter 6

Chapter Awards

Commanding Officer's Commendation

Awarded by the Commanding Officer to an active member of the crew distinguishing themselves by the personal standards set by the Commanding Officer, in a permanent or acting capacity, of a simulation. Worth 20 promotion points.

Executive Officer's Commendation

Awarded by the Executive Officer to an active member of the crew distinguishing themselves by the personal standards set by the Executive Officer, in a permanent or acting capacity, of a simulation. Worth 15 promotion points.

Officer of the Year

Awarded to the Officer that has been active and shown outstanding dedication and performance of duties while being an active member of the Jaresh Inyo. Worth 10 promotion points.

Enlisted of the Year

Awarded to the Enlisted personnel that has been active and shown outstanding dedication and performance of duties while being an active member of the Jaresh Inyo. Worth 10 promotion points.

5 Year Service Pin

The Five Year Service Pin shall be issued every 5 years of active membership to the Jaresh Inyo as a sign of appreciation from the organization for one's service and contributions. Worth 20 promotion points.

1 Year Service Pin

The One Year Starfleet Service Pin shall be issued every full year of active membership to the Jaresh Inyo as a sign of appreciation from the organization for one's service and contributions. Worth 5 promotion points.

Volunteer of the Year

Awarded to an active crewmember that has volunteered one year's worth of time to a charitable organization in the name of the Jaresh Inyo. Worth 50 promotion points.

Volunteer of the Month

Awarded to an active crewmember that has volunteered time to a charitable organization in the name of the Jaresh Inyo. Worth 10 promotion points.

Scholar of the Year

Awarded to an active crewmember that has successfully completed the most Star Fleet/Marine Academy courses within a year or has received a doctorate. Worth 20 promotion points

Scholar of the Year

Awarded to an active crewmember that has successfully completed the most Star Fleet/Marine Academy courses within a month. Worth 5 promotion points.

Contributor of the Year

Awarded to an active crewmember that has contributed time and effort towards the continued operations and promotion of the Jaresh Inyo. Worth 20 promotion points.

Reader of the Month

Awarded to an active crewmember that has finished the most books in the month. Worth 5 promotion points.
